

Urgent Notice

Toyota Oil Filter Applications
February 15, 2007

Several oil filter applications from the Honeywell family of filter lines have recently changed including Fram, Fram Canada, Mileguard, Pennzoil, Performax and Security. This change will be reflected in your 2007 filter catalogs from the manufacturer.

All Toyota models listed below with a **4-Cyl. 2.4L F.I.** engine code of **2AZ-FE** will require the updated oil filter.

Model	Years
Camry	2002-2006
Highlander	2002-2006
Rav4	2004-2006
Solara	2002-2006

The oil filters that will be listed in the 2007 catalogs and should be used on these vehicles are listed below. These numbers will also apply to 2007 models.

Manufacturer	Filter
Fram	PH4386
Fram Canada	PH4386
Mileguard	MO4386
Pennzoil	PZ38
Performax	PO38
Security	SO4386S

ISI contacted the filter manufacturers to verify this information so that it could be promptly relayed to you and in order to make the appropriate changes in the ESM database. The changes to the ESM database are now complete and will be released in March.

You may wish to contact your customers who own one of the vehicles listed above to notify them of this information. We would be happy to help you query your database for any such vehicles that have been serviced at your store. Please call our technical support line at (800) 252-3099 if you would like this assistance.
