

LubeSoft® Dashboard

Manage your stores - **Anywhere, Anytime.**

Dashboard's graphical interface creates an unparalleled user experience that makes store management easier than ever.

Store performance is presented on easy-to-read Dashboard dials and a color-coded display with Green for performance at or above the target and Red for performance below the desired target.

Real-time data and web accessibility.

Dashboard's near real-time data and web accessibility allow you to manage your store and chain with up to the minute analysis from anywhere in the world.

Track performance goals by customizing your Dashboard with targets and thresholds for specific performance statistics. Establishing targets helps determine the performance goals by which each store is measured.

Dashboard updates every five minutes delivering sales figures, ticket averages and car counts from any of your locations during any time of the day. The near real-time data also allows you to compare the day's current statistics with monthly trends, chain averages and statistics from a year ago.
