

# Office Information Link

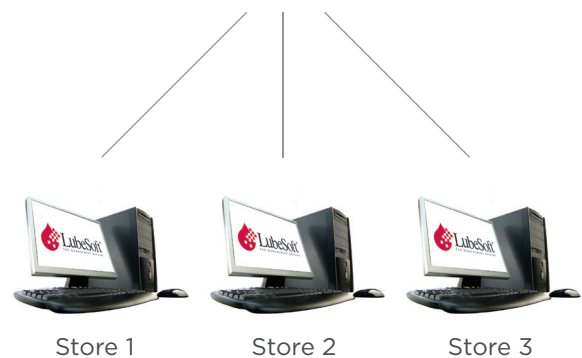

## Manage Your Stores - *Anywhere.*

Office Information Link™(OIL) is designed to provide central LubeSoft® point-of-sale management and reporting for multiple store owners. With OIL, you can change coupon and discount information, update inventory costs, and print store reports from one location. Using OIL, any report available at your stores can be sent to the central location.

OIL allows you to compare store statistics over a period of time, view detailed fleet account information and use the ZIP Code Analysis Report to identify your customer base. You can send new or edited data to all stores from the central office at any time of day without interrupting store transactions. With OIL you can electronically visit all of your stores in one day without leaving your home or office.
